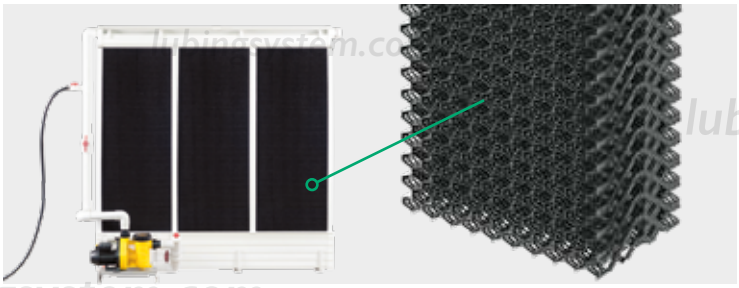
PLASTIC-PADS FOR PAD-SYSTEMS

lubingsystem.com

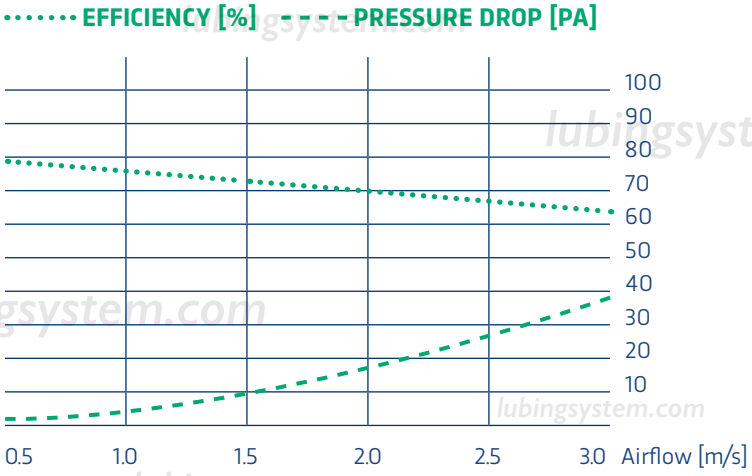
COOLING WITH PADS

LUBING GREENTEC Plastic-Pads deliver powerful and reliable evaporative cooling for greenhouse applications. The patented structure ensures efficient water distribution and high cooling performance, while durable polymer materials and easy cleaning support long-lasting operation. A solution built for efficiency, stability, and lasting quality.



PLASTIC-PAD VERSIONS

Height	Width	Depth	Item
500	600	150	7988-0500
1000	600	150	7988-1000
1500	600	150	7988-1500
1800	600	150	7988-1800
2000	600	150	7988-2000
2200	600	150	7988-2200
2400	600	150	7988-2400



Conditions: outside 32.4 °C at 36.7% RH, inside 24.5 °C at 73.0% RH

ADVANTAGES

- » Excellent cooling performance through optimized water distribution
- » Easy to clean thanks to welded polymer sheets
- » Long service life and high structural stability
- » Very low pressure drop for reduced energy consumption
- » High UV resistance and impermeable to light
- » Chemical-resistant polypropylene construction
